the  $\beta$  phase of the polymer. The  $\beta$  phase is the more ordered phase and is characterized by a higher density and a higher melting point than the  $\alpha$  phase. The  $\beta$  phase is the more stable phase and is the one that is most commonly observed in nature. The  $\alpha$  phase is the less stable phase and is the one that is most commonly observed in the laboratory. The  $\beta$  phase is the more ordered phase and is characterized by a higher density and a higher melting point than the  $\alpha$  phase. The  $\beta$  phase is the more stable phase and is the one that is most commonly observed in nature. The  $\alpha$  phase is the less stable phase and is the one that is most commonly observed in the laboratory.

$$x_1^{(0)} = 2, x_2^{(0)} = 1, x_3^{(0)} = 1$$
